

Business Continuity Built From the Ground Up

Introducing the next generation of hybrid cloud-based business continuity solutions built for businesses of every size. The solutions are designed to make mitigate downtime and growth and transition easy for your business, as your data and storage needs grow.

On the inside, components are optimized to support our robust software platform, which includes instant virtualization and proprietary Inverse Chain Backup™. On the outside, the devices feature hot-swappable drive bays, solid state OS drives, and are built to be field upgradeable.

Business Continuity Solutions Designed for Maximum Functionality and Stability.

SIRIS 2

Enterprise Business Continuity Built from the Ground Up

Datto SIRIS 2 delivers the most aggressive Recovery Time Objective (RTO) of any backup, disaster recovery (BDR) and business continuity solution available. It's designed specifically to mitigate downtime for businesses. SIRIS 2 is available in three distinct product lines.

- SIRIS 2 Business: 500GB to 2TB
- SIRIS 2 Professional: 1TB to 5TB
- SIRIS 2 Enterprise: 5TB to 36TB

ALTO XL

Harness the Power of the Cloud

Datto ALTO XL is the new, cost-effective way for businesses of all sizes to get comprehensive protection against downtime. ALTO XL is easy to use and inexpensive to scale. The solution comes with solid state OS drives, end-to-end encryption, and RAID for added redundancy.

It's big power at an attractive price point.

- ALTO XL: 1TB to 3TB
- ALTO XL Professional: 6TB to 24TB

ALTO 2

The Only Continuity Solution Designed for Small Business

Datto ALTO 2 is the first, and only, business continuity solution built specifically for the unique demands of the small business market. The solution features Hybrid Virtualization, Screenshot Backup Verification, and a new hardware configuration to maximize reliability.

DATTO NAS

Smart, Scalable Storage-Connected to the Cloud

Datto NAS is the only network-attached storage device designed to snapshots of network shares and to sync these shares to the secure Datto cloud. Datto NAS is the perfect complement to the Datto family of Business Continuity solutions, providing extra storage with a superior level of protection.

The Difference – What's Inside

Instant Virtualization, On and Off-Site

Backups can be virtualized locally to the device or to the secure cloud, instantly, with the click of a button. Should a local disaster occur, a business can continue as usual in the cloud. Even while virtualized, systems can perform a normal backup schedule to both the device and to the cloud.

Local virtualization included on:

SIRIS 2

Off-site virtualization included on:

SIRIS 2, ALTO XL, ALTO 2

Hybrid Virtualization

This is the combination of instant off-site virtualization and the single click connectivity of instant local virtualization. Included on:

ALTO XL, ALTO 2

Screenshot Backup Verification

No more guessing if your backup is working properly. The device boots backups as virtual machines, capturing an image of the login page to give you visual proof that your data has been successfully backed up. An industry first. Included on:

SIRIS 2, ALTO XL, ALTO 2

Inverse Chain Technology™

This proprietary technology eliminates broken backup chains. Each time a backup occurs data is converted directly into a virtual machine, with the most recent backup image always being the base image. Data is always available immediately, both on and off-site. Included on: SIRIS 2, ALTO XL, ALTO 2, DATTO NAS

Backup Insights™

This groundbreaking proprietary technology allows you to identify file or application changes between any two backup points. You can easily find that deleted folder or determine which files a virus affected.

Included on:

SIRIS 2, ALTO XL

Hybrid Cloud Structure

All solutions are built with hybrid cloud functionality, providing quick restores and complete data protection.

End-to-End Encryption

All data is protected by AES 256 encryption both in transit and in the cloud. You have the option to encrypt data locally, and pass phrases can be specified per appliance or per protected machine to meet compliance regulations. Included on:

SIRIS 2, ALTO XL

Centralized Management

All solutions are controlled through a central, easy to use web interface. Your provider can configure devices, schedule backup reports, monitor off-site amounts, set up alerts, access marketing support, and more.

Included on:

SIRIS 2, ALTO XL, ALTO 2, DATTO NAS

Broad Operating System Support

Devices Support Microsoft Windows operating systems for almost any Windows PC or server that is still production today. Support currently ranges from Windows 2000 to Windows 8 and Server 2012. Granular recovery is also available for Exchange and Sharepoint servers. Included on: SIRIS 2, ALTO XL, ALTO 2, DATTO NAS

Better Bare Metal Restore

Restore full machines quickly and efficiently through our USB Bare Metal Restore process. Go from physical machines to virtual (P2V) or vice versa with our unique dissimilar hardware tool that allows for maximum flexibility when restoring. No drives or cables needed as the system can run completely over the user's network. Included on: SIRIS 2, ALTO XL, ALTO 2

Award-Winning Support

Tech Support is 100% in-house, available 24/7/365. Included on: SIRIS 2, ALTO XL, ALTO 2, DATTO NAS

Best Upgrade Policy in the Channel

Superior upgrade policy means you can deploy the appliance that fits your needs today, then upgrade later to any larger size in the same line. All models have hot-swappable drive bays so upgrades can be done right in the field.
